

Série 1 : Périmètres et aires

Exercice 1 :

Calculer le périmètre et l'aire de chaque figure (*croquis*):

1)

2)

3)

4)

Exercice 2 :

Calculer le périmètre et l'aire de chaque figure (*croquis*):

1)

2)

3)

4)

Solutions :

Ex 1: 1) $P = 12 \text{ dm}$; $A = 9 \text{ dm}^2$; 2) $P = 20 \text{ cm}$; $A = 20 + 4 = 24 \text{ cm}^2$

3) $P = 12 \text{ m}$; $A = 6 \text{ m}^2$; 4) $P = 15 \text{ dm}$; $A = 10,5 \text{ dm}^2$

Ex 2 : 1) $P = 20 \text{ cm}$; $A = 24 \text{ cm}^2$; 2) $P = 34 \text{ dm}$; $A = 54 \text{ dm}^2$

3) $P = 23 \text{ m}$; $A = 45 \text{ m}^2$; 4) $P = 19 \text{ cm}$; $A = 9,5 \text{ cm}^2$
